Critical factors for positive environmental impact

## Resource Efficiency and Circular Economy - Sharing business premises

Partners: IVA och ett 40-  
tal bransch och samhälls-  
aktörer

- **The state** – regulation, creating conditions, adjust laws and regulations,
- **The municipality** - infrastructure, collaboration, demand
- **Business** - services, business models, agreements, platforms, good working conditions, innovation and standards.
- **Financial sector** - valuation, insurance, financing
- **Civil society** - commitment, organization
- **The Academy** - sustainability assessments, evaluations, innovate forms of sharing, test beds

... Partnerships

## Governing Sharing Cities

- The forms are new to everyone, actors need to act in parallel.
- Partnerships, in many cases collaboration is needed as sharing goes across sectoral boundaries, both within and between organizations.
- There are great sustainability benefits to be gained, but how sharing is implemented determines how sustainable it becomes.
- The municipality has a central role in shaping sharing so that it provides these sustainability benefits.

Thank you!
